AUSTIN MIN

min.austin16@gmail.com | austinmin.com | github.com/au-s-ti-n | linkedin.com/in/minaustin

EDUCATION

Santa Clara University, College of Arts and Sciences | Expected Dec 2025
Computer Science, B.S. | Minors in Mathematics, Computer Engineering | GPA: 3.78 | *Santa Clara, CA*
Relevant Coursework: Data Science, Web/Data Mining, Applied ML, Algorithms, OS, Computer Graphics
Activities: Association for Computing Machinery, BroncoSec (BroncoCTF 2023 1st place), Math/CS Society

EXPERIENCE

Sports Science Data Analytics Intern | Nov 2024 - June 2025
Santa Clara University Athletics | *Santa Clara, CA*
- Retrieved and processed >1m rows of GPS data from Catapult's APIs to generate heatmaps, scatterplots, and other visualizations to discover valuable insights for men's soccer coaching and training staff
- Built 3 ML models to predict match outcomes using sklearn given game stats from 50+ past matches

Computing Intern | June 2024 - Sep 2024
Lawrence Livermore National Laboratory | *Livermore, CA*
- Constructed a system for FN hires that sends approval requests to managers, processes approvals, and notifies completion of the process automatically using Power Platform, cutting labor by more than 50%
- Innovated the AGA ECM process by adding automated check-in date notifications and data processing using PPAF and a custom UI with PowerApps to improve efficiency in the director's office division

Data Analyst Intern | June 2023 - Nov 2023
Trane Technologies | *San Jose, CA*
- Employed HTML/PPAF to create an automated delivery tracking system with Oracle ERP for customers
- Generated inventory/sales reports of 100k+ items using SQL and Python to assist supply management
- Performed inventory updates and closings through ERP system to support the accounting sector

PROJECTS

SCU, I See You | May 2025 - June 2025
- Designed a campus building image classification system using 3 pre-trained and 1 custom CNN model
- Manually collected and processed 1372 images for training, optimized models with iterative Grid Search

Steam Game Recommender | Feb 2025 - Mar 2025
- Conducted data preprocessing on 97k+ Steam games and analyzed vocabulary associations with ARM
- Created, analyzed, and tested a weighted IR model using SBERT and relevance feedback to return game recommendations similar to a game description query with high similarity scores for the 7 query types

Pre-Release Movie Ratings Predictor | Oct 2024 - Dec 2024
- Processed 17k+ rows of raw data by using feature selection/evaluation, encoding, and normalization
- Trained 8 ML models on preprocessed data and used visualization methods to decide optimal models, resulting in ~85% accuracy, and tested models on 4 upcoming movies to predict their future ratings

Social Network App Model | May 2023
- Applied friend network, post and comment, and profile functionalities using graph algorithms, polymorphism, and embedded data structures for a set of 100+ model users through Qt software

SKILLS

Languages: Python, C, C++, SQL, HTML, CSS, Javascript, Java, Dart, Luau, Bash, Verilog, Assembly, Chinese
Technologies: Git, GitHub, Figma, Jupyter, MySQL, scikit-learn, pandas, PySpark, React, Flutter, Vercel, Postman, Firebase, Qt, GA4, GTM, Linux/Unix, NLTK, Three.js, SVG, PPAF, IBM Quantum, WebGL, Vue.js
Other: 2D/3D animation, Web Design, QA Testing, Agile SDLC, Cryptography, LLMs, OSINT, LaTeX, RegEx, Circuit Design, Notion, Math Finance, OBS, Video Editing, Audacity, 3D printing, CAPMT Piano Level 12
